

WATER LINE

META LS 2/2 FREE

The Meta range combines our lighter materials and style for versatile wetsuits. Our Meta wetsuits are made with Eicoprene which is a non-petroleum-based synthetic foam coming from a mix of limestone and recycled tires (30%). The lamination process to paste the recycled polyester lining uses Aqua-A™ water-based glue which is completely solvent-free and with no harmful chemicals. The Meta LS 2/2 zip-free long sleeves version is designed for your spring and summer sessions. It stands out thanks to Flexskin technology which provide ultimate stretch and comfort in order to ride big waves no matter what the conditions outside. It also features flatlock seams which give flexibility and enhance radical moves. This added to fuse cut and drain holes allow minimal water entry and maximal water draining. Last but not least, the Meta 2/2 features the STD lining to insulate and retain body heat. A minimalist style for great sessions!
