

SUMMER EXPEDITION

Murakami jkt

One of our most versatile jackets for your everyday use whether it is for urban explorations or outdoor adventures. The Murakami has everything to delight style and performance-driven enthusiasts. The body-mapping construction and Polartec® Power Stretch® technology make it a highly stretch jacket that allows unlimited range of motions. It also delivers an ultra-light and warm protection thanks to the Primaloft® Eco 100-g insulation. Its Teflon EcoElite™ PFC-free DWR treatment offers water repellency all day long. Last but not least, elastic bands at cuffs, waist and hood give additional protection against the natural elements. Ultra-light and warm, the Murakami is the perfect companion!
