# ABOUT US

**RIDE**

**PROTECT**

**SHARE**

These three words capture the essence of Picture Organic Clothing.  
This is also the story of three lifelong best friends from different backgrounds:  
Julien, Jeremy, and Vincent.

Chasing a childhood dream and united by a shared passion for boardsports, they sought to create something new that reflected their identity, and with a very clear vision founded Picture in 2008.

## A NEW DESIGN

Jeremy has background in architecture, not fashion, which means that he and his team approach product design from a different, truly unique perspective.

## A NEW WAY OF THINKING

It is not a ski or a snowboard brand, but an environmentally-responsible outdoor brand dedicated to boardsports and the great outdoors.

## A NEW PHILOSOPHY

The brand's products are eco-engineered (made with recycled & bio-based materials) to help in the fight against climate change.

With many uncharted regions still left to explore, this initially small expedition among friends has transformed into a lifetime of adventure!

OUR MISSION IS TO FIGHT

CLIMATE  
CHANGE

CLICK  
HERE

# WIPE OUT FOSSIL FUELS

Today, the fight against climate change requires wiping out our dependence on fossil fuels: coal, oil and natural gas.

**WIPE OUT**  
FOSSIL FUELS ♻️

100% of our products are made of recycled, organic or bio-sourced materials.

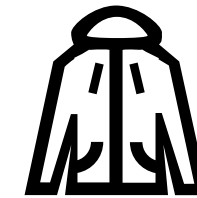

**We are a member of the Fair Wear Foundation as part of our effort to continue to improve working conditions for the people who make our products.**

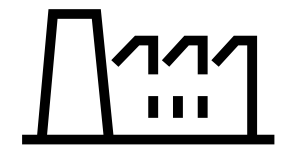

Every year, FWF conducts an audit on our purchasing practices, our relationships with factories, and on our ability to implement initiatives that benefit workers.

Participating in FWF's continuous improvement process requires thorough knowledge of how every factory works, of potential subcontractors, and how to conduct audits to ensure compliance with the foundation's labor standards.

**84%**

**84% of our total production volume is made in just two factories we've been working with since the creation of Picture in 2008**

**100%**

**100% of our factories participate in FWF's program to improve labor conditions**

**Complying with the 8 pillars of the Fair Wear Foundation's labor standards is the underpinning of our partnership with the foundation and every factory.**

**1** employment is freely chosen

**2** freedom of association and the right to collective bargaining

**3** no discrimination in employment

**4** no exploitation of child labour

**5** payment of a living wage

**6** reasonable hours of work

**7** safe and healthy working conditions

**8** a legally binding employment relationship

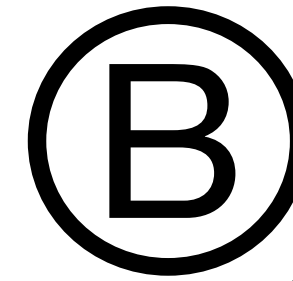

The Li Lian factory in Dongguan, China, makes our recycled polyester and bio-sourced technical apparel.

# TOGETHER, LET'S USE BUSINESS AND OUR INFLUENCE TO CHANGE THE SYSTEM.

Certified

Corporation

In 2019, we received B Corp certification, the highest distinction today for companies committed to making environmental and social responsibility a core part of their business operations.

We view certification as validation of what we have already implemented as well as a fantastic way to identify the areas of improvement, providing us with a great roadmap for future actions and programs.

# POLYBAG : NO LONGER NEEDED

---

We are proud to announce that we reduce  
our use of polybags by

**64%**

compared to last summer!

This important step forward against the plastic pollution  
would not have been possible without the help of all our  
retailers, logistics and suppliers partners.

Thank you all!

---

# OUR MATERIALS

The textile industry is responsible for approximately 8% of overall worldwide carbon emissions.

Venturing off the beaten path by using materials and processes to reduce our impact is the starting point for our commitment to the environment.

100 % of our products are made of :

ORGANIC MATERIALS

RECYCLED MATERIALS

BIO-SOURCED MATERIALS

RE-USED MATERIALS

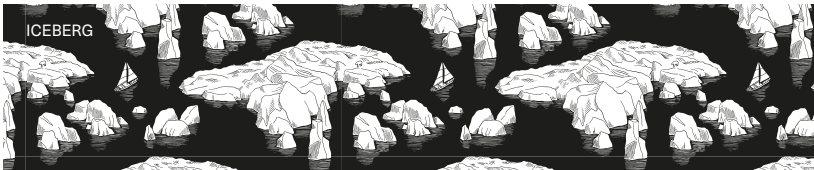

ANIMAL-BASED MATERIALS

CINTRA TECH LEGGINGS

XS/S-M/L

Versatile and highly stretch, the Cintra is part of our range of high-performance eco-friendly tech leggings designed for your outdoor activities and indoor training! The Cintra is body-mapping constructed with our breathable Dry Now fabric to keep moisture out added to Dry Feel anti-microbial treatment to keep it fresh as long as possible. Last but not least, it features flatlock seams for extra comfort, an inside mesh pocket to store your cellphone, elastic waistband for maximum support, and reflective detailing for you to stay visible even when it's getting dark. With pure style, it's the best companion for your all your activities including running, hiking and yoga!

TENCEL™ fibers help maintain environmental balance by being integrated into nature’s cycle

TENCEL™ in nature’s cycle

TENCEL™ fibers help to maintain the environmental balance by being integrated into nature’s cycle. The fibers originate from the renewable raw material wood (FSC certified), created by photosynthesis. The certified biobased fibers are manufactured using an environmentally responsible production process. The fibers are certified as compostable and biodegradable.

# DAD & SON COLLECTION

## The vocation of a father and his son

« As a child, my father loved Superman, Kit Carson and Mandrake - fabulous tales of heroes whom he, little by little, redraw precisely, with their facial features and expressions. As a teenager, when he was not studying, he was drawing. Mum described him as not very talkative and she would often find him wandering in his imagination, expressing himself through sketches on the corner of a café's tablecloth.

When he graduated from university, he wanted to have a career combining human relations and his passion for drawing... so why not architecture? He started learning as an apprentice, and then, progressing from one office to another, he entered the profession. It was the time of the Rotring Stylograph and set-squares on old-fashioned, counterbalanced drawing boards, when everything was done manually.

Thanks Dad

Jeremy

After having worked as a draughtsman and colourist, he specialized in catalogue design, using Indian ink and watercolour. Dad, as genuine artist, was fond of everything related to graphic art and, as a true devotee, never accepted that the software superseded the pen.

When I created Picture in 2008, my father quickly endorsed the philosophy of the brand and my desire to redesign the world with fresh colours. Profoundly influenced by the artistic background of my father, I often find it in many of my designs and creations.

Dad & Son is two generations of artists coming together, sharing a passion for art. »

Picture and the World Wildlife Fund (WWF) are proud to partner up again for a common cause in the fight against climate change:

WWF is our main partner on this journey. Their influence, their skills, and their vast network will be a great help to phase out our dependence on fossil fuels, including oil.

From raw materials to packaging by way of travel and shipping, every aspect of our business is concerned.

*“Climate change is perhaps the greatest challenge humanity has ever faced.”*

# WATER LINE

---

An eco-friendly surf range for responsible adventurers !

Our goal is to combine surfing and the adventurous spirit: seeking the perfect wave, looking to share the authenticity of travel, diving fully into nature's wonder.

Picture designed a full range of wetsuits, boardshorts, swimwear and accessories for surfing.

Since materials play a big role in a product's lifecycle, we have improved quality while reducing our environmental impact by opting for alternatives such as EicoPrene, Econyl (trademark) recycled polyester, and recycled nylon.

We have also improved wetsuit and boardshort construction, ergonomics, and design to enhance performance and increase confidence in the water.

This season, we are coming up with a brand new range of swimwear and a new neoprene technology : Flexskin.

# EICOPRENE

## SUSTAINABLE RESOURCES

NON ALLERGENIC : NON-USE OF NEOPRENE OR SOLVENTS

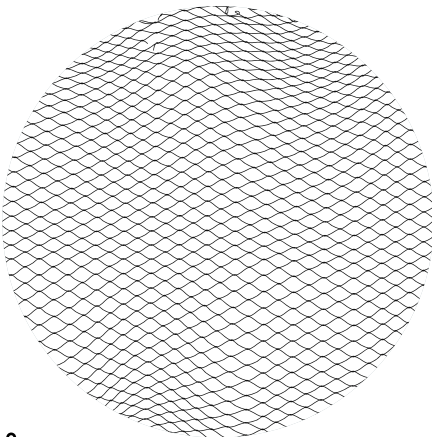

ALONG WITH OTHER SURF-INDUSTRY BRANDS COMMITTED TO THE CAUSE, WE WOULD LIKE THESE "ALTERNATIVE" MATERIALS TO BECOME MORE MAINSTREAM AND CONTRIBUTE TO MAKING SURFING A MUCH CLEANER ACTIVITY FOR THE ENVIRONMENT. EVEN IF PICTURE IS STILL RELATIVELY NEW TO THE WETSUIT MARKET, WE HAVE TO SHOW THAT SOLUTIONS DO EXIST AND EVOLVE OVER TIME. LET US ALL WORK TOGETHER TO EFFECT CHANGE!

Eicoprene is a foam material that has the same technical features and profile as conventional neoprene. However, there is nothing conventional about the origins of this new material. Whereas neoprene is petroleum-based, Eicoprene is made from a mix of limestone (70%) and recycled tires (30%)

All carbon black made from recycled tires and limestone

Polyamide linings made from recycled fishing nets

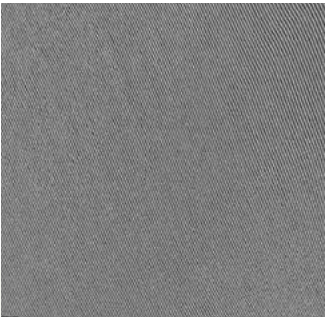

AQUA 

eco-friendly water based aquaglu

# Flex Skin

Flexskin is an eco-friendly and extremely stretch neoprene that allows full freedom of movement while surfing. It provides both comfort and resistance but is also highly flexible around the arms, shoulders and upper-body. Flexskin merges naturally with your body during your ocean adventures. It provides a real second skin effect !

4 WAY STRETCH

SECOND SKIN EFFECT

SUSTAINABLE FABRIC

We've been using organic, recycled and bio-sourced products since Picture was created in 2009.  
We are now proud to use Econyl® 100% regenerated nylon fibers into VITA Fabric as another step forward into this commitment.  
Wiping out fossil fuels in every aspect of our business is our number one priority in the fight against climate change.

**Step 1: ECONYL® REGENERATED NYLON YARNS**  
No waste. No new resources. Just endless possibilities.

- 100% regenerated nylon yarns from fishing nets and other discarded materials
- No loss of quality & durability in regeneration process
- 100% recyclable

**Step 2: ECONYL® YARNS knitted to create VITA FABRIC**  
Sustainable techno-fabric, made of ECONYL®

Made of 78% ECONYL® regenerated NYLON

Chlorine & sunscreens damages resistant

## BAGS

Because every journey has its own story, we like to imagine the bags that will serve adventure enthusiasts travelling, moving and discovering. The backpack is, more than ever, the adventurer's essential! Our bags offer storage options and optimization that will fit all camping styles, air travel and rail journeys, ride & bike trips and even urban escapes. All the good reasons to enjoy adventure and the unexpected!

Every single bag from our product line is using recycled polyester and/or organic materials and is made in ethical factories!

# CLIMATE CONTROL

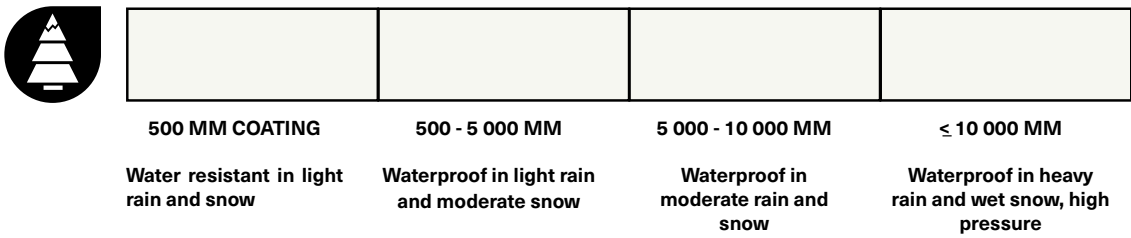

To keep you warm, dry, and comfortable, we developed unique, eco-friendly climate control solutions.

Picture's best technologies and features offer warmth, waterproofness, breathability, wind protection and stretchiness to help you choose the right gear for your activities.

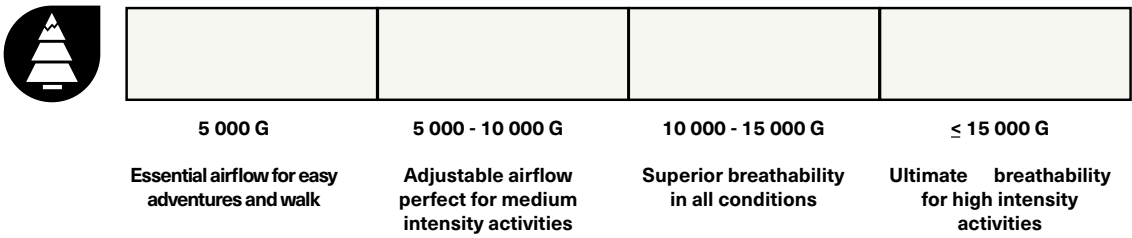

## 1. WARMTH

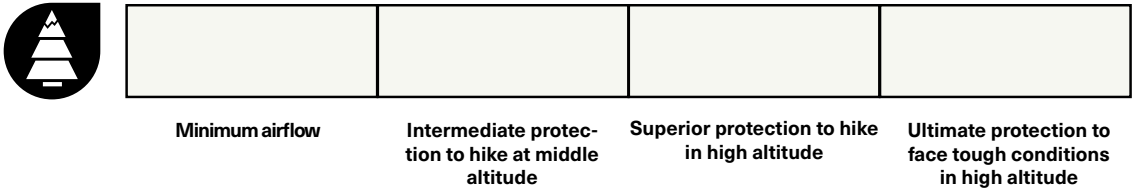

## 2. WATERPROOFNESS

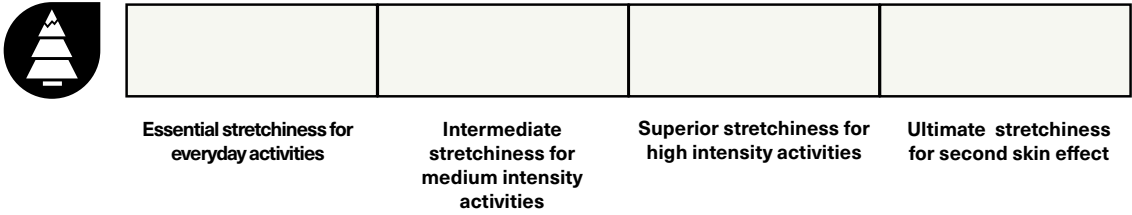

## 3. BREATHABILITY

## 4. WIND PROTECTION

## 5. STRETCH

# DRYPLAY

PICTURE'S DRYPLAY MEMBRANES

Breathable, durable,  
keeps you dry in all weather conditions

## DRYPLAY MEMBRANE

- Polyurethane (pu) blend laminate membrane
- Waterproof, windproof, and breathable
- High durability keeps the user dry in all weather conditions
- Laboratory and field tested

## DRYPLAY RECYCLABLE MEMBRANE

- First 100% recyclable membrane
- Textile and membrane can be recycled together like plastic bottles
- Polyurethane (pu) blend laminate membrane
- Waterproof, windproof, and breathable
- Highly durable
- Keeps the user dry in all weather conditions
- Laboratory and field tested

## DRYPLAY BIOSOURCE

- The first step in our zero oil mission, our first membrane made with castor oil pebax® rnew® a partially bio based, renewable technology.
- Waterproof, windproof, and breathable
- Highly durable
- Keeps the user dry in all weather conditions
- Laboratory and field tested

## PICTURE'S HIGH-PERFORMANCE THERMOREGULATION TECHNOLOGY.

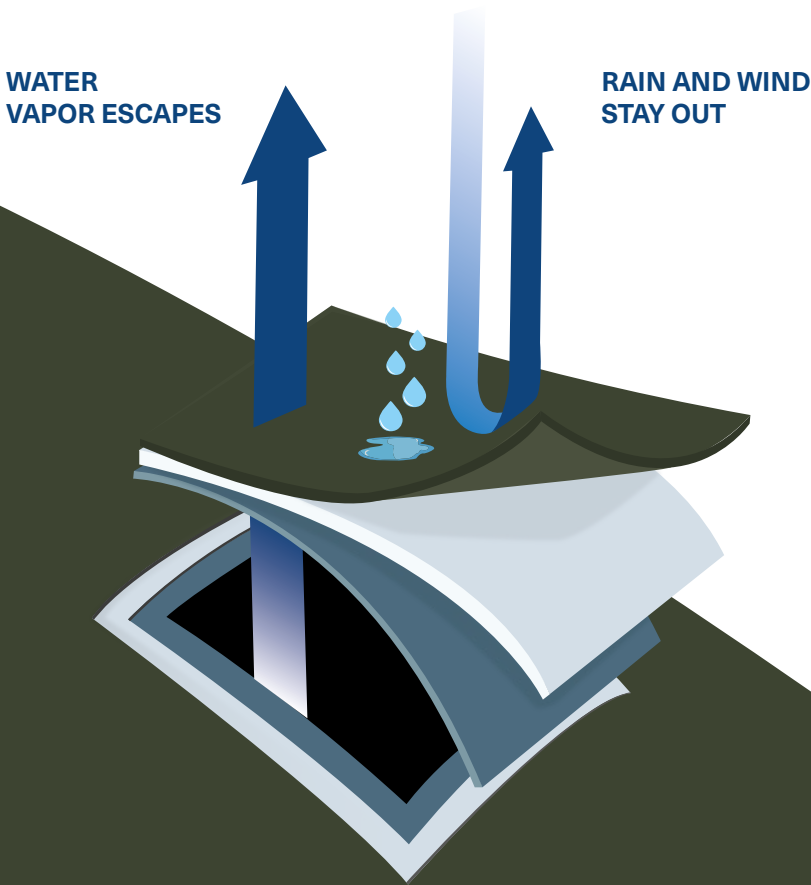

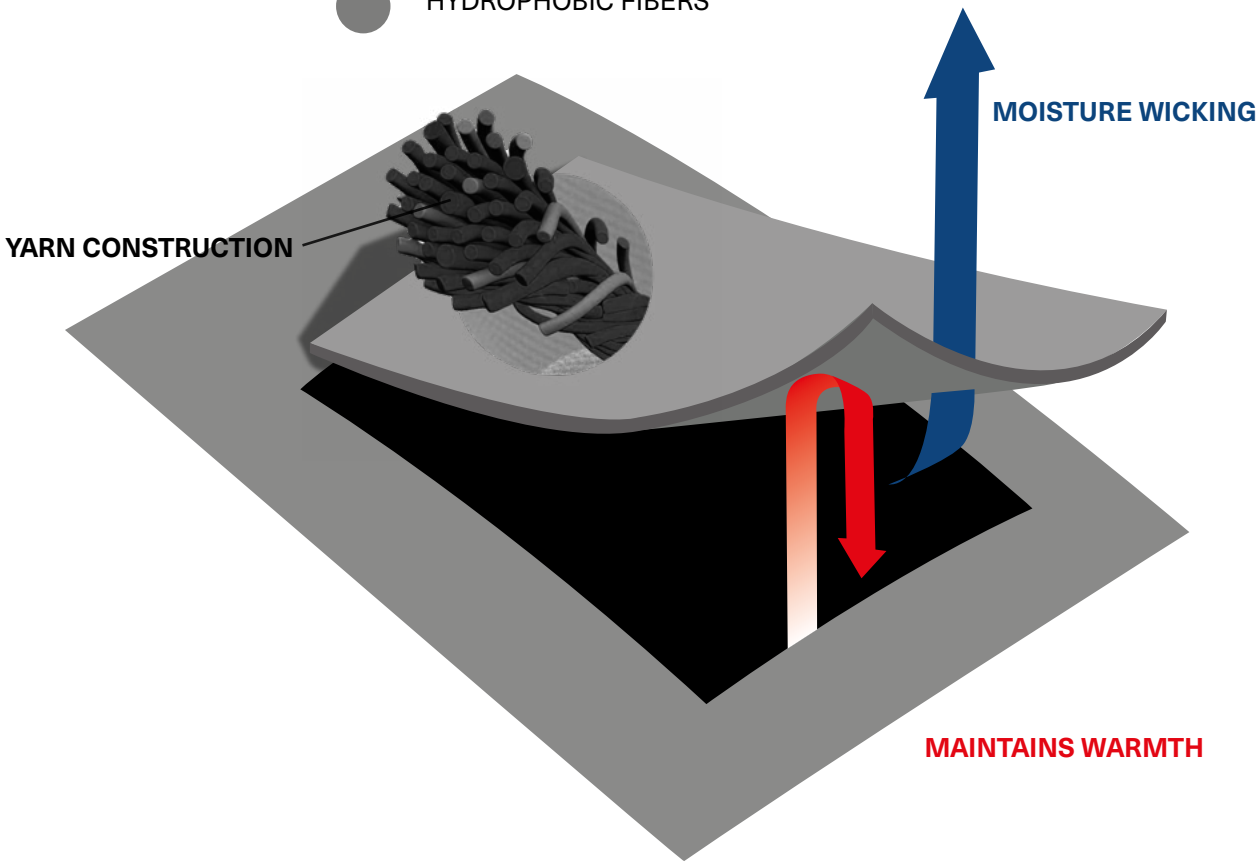

Recycled polyester blend of hydrophilic and hydrophobic fibers.

Wicks moisture away from the skin and pushes it to the outer layer where it evaporates quickly.

Keeps the user dry and fresh or warm during high intensity activities

Available in several fabric weights for adjustable breathability and warmth (dry now, dry now std, dry now std air, dry now lt)

- HYDROPHILIC FIBERS
- HYDROPHOBIC FIBERS

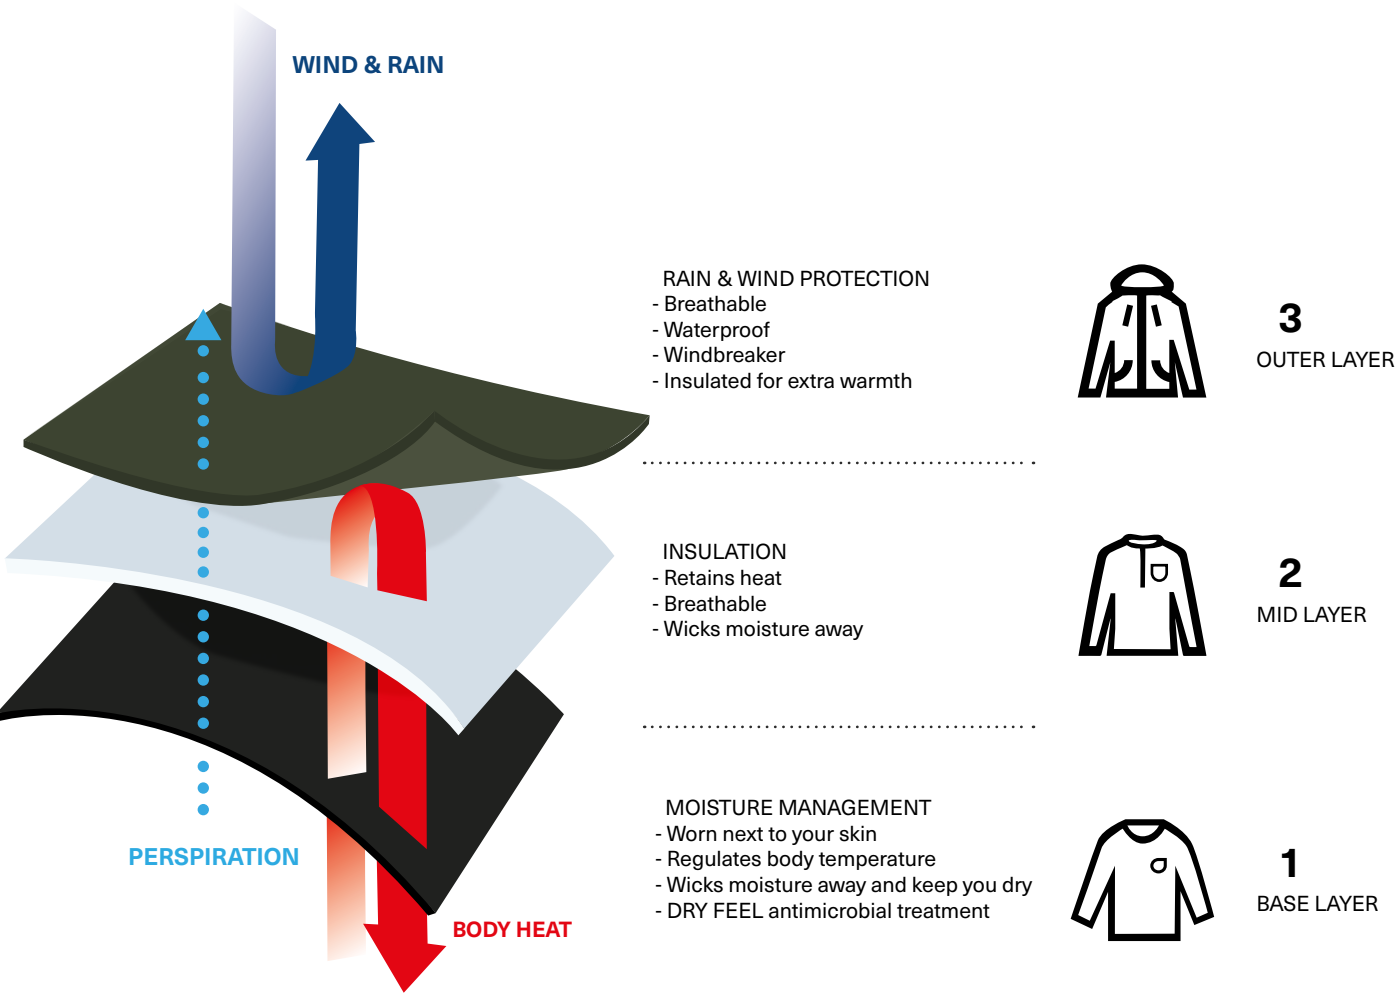

- FACE FABRIC
- DRYPLAY
- LINING

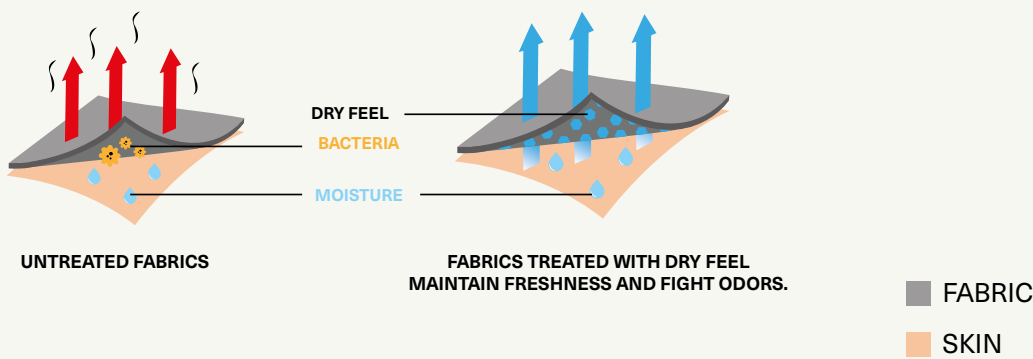

# LAYERING

Layering is important for managing your climate control in any situation. Regulate temperature and comfort by slipping layers on and off based on the intensity of your effort or as the weather

changes. Picture now offers a full range of base layers, mid layers, and outer layers (shells) to help you customize your ideal setup.

## DRY FEEL

# GREEN CERTIFICATIONS

AVITERA SE :  
Dyeing organic cotton with Avitera SE dyes leads to  
- Environment benefits: water and energy savings (50%), Reduced CO2 emission (50%)  
- Consumer benefits: helps colors stay bright and dark shade stay dark , substrates dyed with AVITERA® show no trace of PCA (Para-Chloro Aniline)

Spring Summer 21: 32% of our organic cotton lifestyle collection is now dyed with Avitera SE.

BLUESIGN APPROVED FABRIC

Bluesign technologies works at each step in the textile supply chain to approve chemicals, processes, materials and products that are safe for the environment, safe for workers, and safe for the end customer.

GLOBAL ORGANIC TEXTILE STANDARD

The GOTS framework is recognized as a global reference for textiles made from organic fibers. It defines high-level environmental criteria throughout the supply chain for organic textiles and also requires compliance with social criteria. Only textile products that contain a minimum of 70% organic fibers can become GOTS certified.

GLOBAL RECYCLED STANDARD

The Global Recycled Standard provides verification of recycled materials, and then tracks the materials throughout the entire supply chain and to the finished product. It includes additional social, environmental, and chemical processing requirements.

ORGANIC CONTENT STANDARD

The Organic Content Standard is used for textiles made with organic grown materials. The aim of this standard is to guarantee the traceability and integrity of the raw materials during every phase of the manufacturing process. OCS 100 logo is used only for products that contain 95% or more organic material.

ORGANIC BLENDED CONTENT STANDARD:

OCS blended is used for products that contain 5% minimum of organic material blended with conventional or synthetic raw materials.

TEFLON ECOELITE™  
PFC FREE DURABLE WATER REPELLENT TREATMENT

Teflon EcoElite™ is a renewably sourced, non-fluorinated (PFC-free) fabric treatment for durable water repellency and is manufactured with 60% renewably sourced raw materials.

# TECH INDEX

**BIO SOURCE FABRIC:**  
We present our first bio-sourced and recyclable polyester fabric made from sugarcane by-products unsuitable for human consumption.  
Today, we pioneer this innovative and eco-friendly fabric to lead and initiate change in the outdoor industry. Bio-sourced products are an integral part of our quest to wipe out fossil fuels and will be used in our Expedition range, which makes up over 30% of our technical garments.  
63% Bio-sourced / 37% Recycled Polyester Mini Reps  
58% Bio-sourced / 42% Recycled Polyester Stretch

**CORDURA®:**  
Cordura® fabric is a collection of fabrics qualified by INVISTA for use in a wide array of products from luggage and backpacks to boots, military wear and performance apparel.

**DRY NOW:**  
High-performance technology using a recycled polyester blend of hydrophilic and hydrophobic fibers that wicks moisture away from the skin and pushes it to the outside where it can evaporate quickly.

**DRYPLAY:**  
This polyurethane (pu) blend laminate membrane is waterproof, windproof, and breathable. Extremely durable, it keeps the user dry in all weather conditions. Laboratory and field tested.

**DRYPLAY BIOSOURCE:**  
The first step in our «zero-oil» objective, our very first membrane made withl Pebax® Rnew®, a bio-based and re-nearable plastic

**DRYPLAY RECYCLABLE:**  
The first 100% recyclable membrane. The face fabric and membrane can be recycled together like plastic bottles. This polyurethane (pu) blend laminate membrane is waterproof, windproof, and breathable. Extremely durable, it keeps the user dry in all weather conditions. Laboratory and field tested.

**DRY FEEL:**  
Our new antimicrobial and anti-odor treatment that keeps your base layers as fresh as it was new for more active days. It also

**ECONYL®:**  
ECONYL® is 100% regenerated nylon fiber from fishnets and other nylon waste. Same quality as new nylon and 100% recyclable.

**EICOPRENE:**  
Eicoprene is a foam material that has the same technical features and profile as conventional neoprene. However, there is nothing conventional about the origins of this new material. Whereas neoprene is petroleum-based, Eicoprene is made from a mix of limestone (70%) and recycled tires (30%).

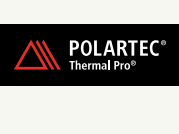

**FAST DRY 4D RECYCLED STRETCH:**  
Made of recycled polyester and elastane, this fabric features a unique hydrophobic construction for maximum stretch and fast drying properties.

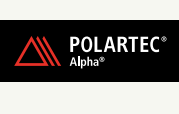

**FLEXSKIN :**  
Flexskin is an eco-friendly and extremely stretch neoprene that allows full freedom of movement while surfing. It provides both comfort and resistance but is also highly flexible around the arms, shoulders and upper-body. Flexskin merges naturally with your body during your ocean adventures. It provides a true second skin effect !

**POLARTEC® POWER STRETCH®:**  
Made with 84% recycled fibers and developed to expand our base fabric's durability and range of motion. By using elastic fibers with enhanced resilience in our stretch construction, we made a performance-fit base fabric that can handle the demands of intense physical activity. It also keeps you dry when you sweat and provides warmth.

**POLARTEC® THERMAL PRO®:**  
Made with 75% recycled fibers and designed using new, innovative knitting techniques. The ability to regulate core temperature for maximum comfort is provided by thermal air pockets that trap heat without restricting breathability. Minimizing the mass through open air channels also drastically reduces fabric weight and increases compressibility for better packing and storage.

**POLARTEC® ALPHA®:**  
Made with 78% recycled fibers, Polartec® Alpha® was the first high performance fabric to establish the concept of active insulation. Patented low-density fibers are placed between air-permeable woven layers to create efficient core body temperature regulation and retain warmth while wicking away moisture.

**PRIMALOFT:**  
The world's best synthetic insulation alternative. PrimaLoft® insulation is soft, water resistant, warm without bulk, breathable, lightweight, and packable. At Picture we use PrimaLoft® insulation ECO with 60% post-consumer recycled content.

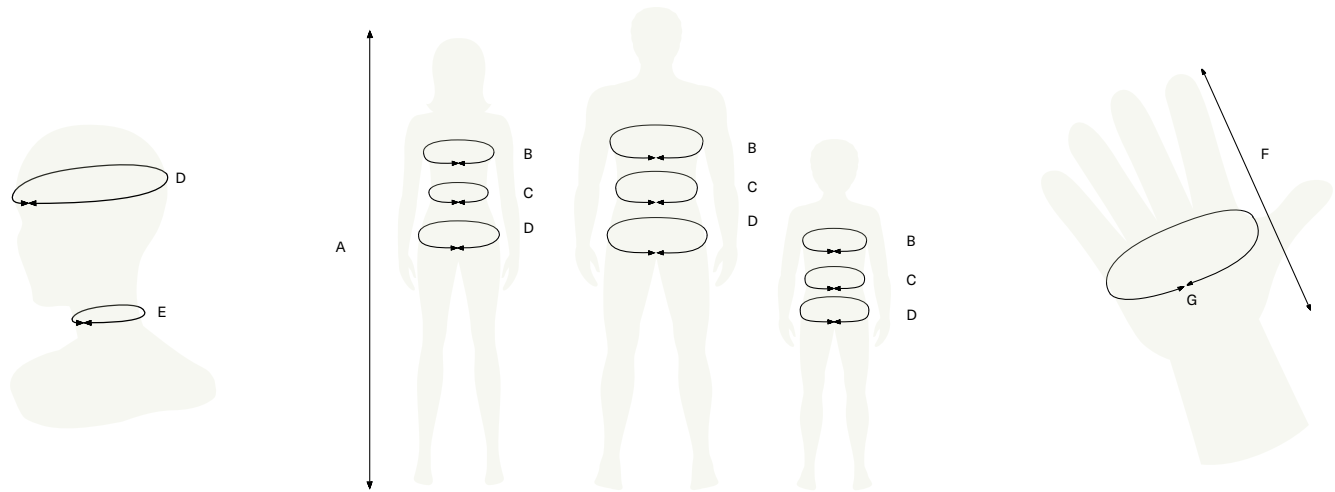

**TEFLON ECOELITE:**  
PFC-Free durable water repellent treatment using renewably sourced Teflon EcoElite™ Technology. Zero pollution, zero allergies, zero impact on future generations. Guaranteed 90% efficiency after 10 washes.

**TENCEL™:**  
TENCEL™ branded fibers offer a range of features including botanic origin, sustainable production, gentleness of skin, long-lasting softness, silky smoothness, enhanced breathability, color retention and biodegradability. TENCEL™ fibers are produced by environmentally responsible processes from the sustainably sourced natural raw material wood (FSC certified).

**VITA BY CARVICO:**  
A sustainable techno-fabric, made of a ECONYL® regenerated Nylon that turns waste problems into fashion and sportswear solutions. Vita is versatile, hyper-resistant, thin, stretch, soft and breathable. Thanks to its innovative construction, it is twice as resistant to chlorine and suntan creams and oils than competitors' fabrics.

MEN

Picture most common fit !!!

**REGULAR FIT**

Picture most common cut. It provides enough room to move easily your chest and arms while giving you a fitted silhouette thanks to its straight cut.

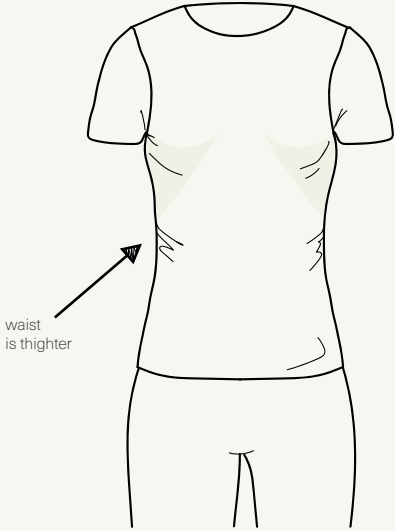

Larger and longer !

**RELAXED FIT**

Our relaxed fit is the go to for those who seek comfort first. It is a bit larger and longer than the regular fit to provides a looser fit with more room.

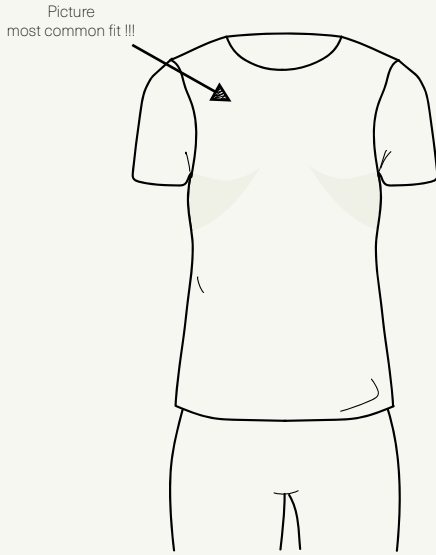

WOMEN

waist is thighter

**SLIM FIT**

Our slim fit for women only is tighter than the regular slim. It provides a body fit effect for those who like to wear skinny teeshirts

Picture most common fit !!!

**REGULAR FIT**

Picture most common cut. It gives enough room to move easily your chest and arms while giving you a fitted silhouette thanks to its straight cut.

sleeves are longer and larger

**BOXY FIT**

Our boxy fit is the same basis than the regular fit. It only features longer and larger sleeves that fall just above your elbows.

## THANKS TO

Riot House production is a company composed by 14  
collaborators fascinated by medias, images and the  
audiovisual market.

Photography, audiovisual techniques, international  
business and communication are the key skills which  
bring credibility and efficiency to their work.

23 rue de la Tannerie 63119, Chateaugay. France
